### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-20 is the inclusion of at one process cartridge below a transfer belt, the at least one process cartridge comprising a casing including a flexible sheet in contact with an image carrier surface and arranged to separate a brush roller from the charging member; and an exposure device below the at least one process cartridge. This is found in all of claims 1-20, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 21, 22, and 24-32 is the inclusion of a process cartridge having a casing including a flexible sheet in contact with the image carrier surface and arranged to separate the brush roller from the charging member. The flexible sheet comprises urethane resin. This is found in all of claims 21, 22, and 24-32, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 33 and 38 is the inclusion of a method of cleaning positively charged residual toner from the surface of rotating image carrier with a brush roller charged with negative charge; grounding the charging roller; cleaning the brush roller by applying a positive charge to the brush roller so that collected toner is transferred from the brush roller to the surface of a rotating image carrier; and collecting onto the developing roller the toner transferred from the brush roller. This is found in all of claims 33 and 38, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 35 and 37 is the inclusion of a means for cleaning positively charged residual toner from the surface of rotating image carrier with a brush roller charged with negative charge; means for grounding the charging roller; means for cleaning the brush roller by applying a positive charge to the brush roller so that collected toner is transferred from the brush roller to the surface of a rotating image carrier; and means for collecting onto the developing roller the toner transferred from the brush roller. This is found in all of claims 35 and 37, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 39 is the inclusion of a casing in an image process cartridge. The casing includes a sheet comprising urethane resin in contact with an image carrier surface and arranged to separate the brush roller from the charging member. This is found in all of claim 39, but not disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
